Google to Jira - GTJ

A Google Jira integration, to turn emails and meetings to Jira issues, log work and share content from Gmail, Calendar or Drive

The app allows you to:

- Create, edit and comment on Jira tickets using Google Mail (Gmail), Groups, and Calendar
- Add the e-mail subject as the summary, and the body as the description or a comment
- Include the e-mail itself as an attachment (HTML format)
- Upload e-mail attachments and inline images
- Select one or more attachments from your Google Drive files to upload to Jira
- Auto-detect issue keys from the e-mail subject
- Auto-detect meeting and event duration to log as work on Jira with Google Calendar time tracking
- Select any text in the Chrome browser, right-click and choose from all the GTJ features (create, edit, and comment) from the selected text
