

How to Configure In App & Desktop Notifications

Overview

To configure you add-on, you will need to have administrator access on your Jira instance.

Quick Steps

Step #	Action
1	Click on Manage App
2	On the side menu look for In App & Desktop Notifications for Jira (You will see two actions one related to Preferences and the other related to Notification Settings)
4	You will be able to navigate to one of the pages below where you can adjust the add-on configuration.

The screenshot shows the Jira Administration interface. The top navigation bar includes 'Jira', 'Dashboards', 'Projects', 'Issues', 'Boards', 'Plans', 'Assets', and a 'Create' button. A search bar is also present. Below the navigation bar, the 'Administration' section is active, with a search bar for 'Search Jira admin'. The 'Manage apps' tab is selected, showing a list of applications on the left sidebar and a main content area. The main content area displays 'Preferences' for the selected application, with a sub-section for 'General Preferences'. Under 'General Preferences', the 'Desktop Notifications' toggle is turned on, indicated by a green checkmark.
