# How to Configure Received Notification Using In-App Notification Scheme

## Overview

In-App & Desktop Notifications for Jira sends notifications depending on In-App Notification Scheme, to change how notifications are received you can create new Notification Scheme and add it to the In-App project settings as shown below:

## **Quick Steps**

Step #	Action
1	Choose your Project and go to Project Settings.
2	On the side menu look for In App Notification Schemes
3	Choose your preferred notification scheme to apply to In app add-on.

### **Project settings**

Summary Details	The notification scheme selected below will define how notifications are configured for this project by In-App & Desktop Notifications for Jira.
