

How to Mention User in description

Feature Overview

When creating an issue, you can now mention users in the description. Additionally, you can include mentions when adding a comment to an existing issue. To mention a user, type "@" followed by part of the user's display name (full name). A popup will show up listing all users matching the query.

Quick Steps

Step #	Action
1	Type "@" followed by part of the user's display name (full name) in the Description field
2	Select a User from the Users list popup
