

How to Enable Notification & Category Tag on the Email Message

Feature Overview

In this guide, you will learn how you can tag all the emails you have created a Jira issue from, to keep track of them, and how you will be notified when the ticket is created from a certain email.

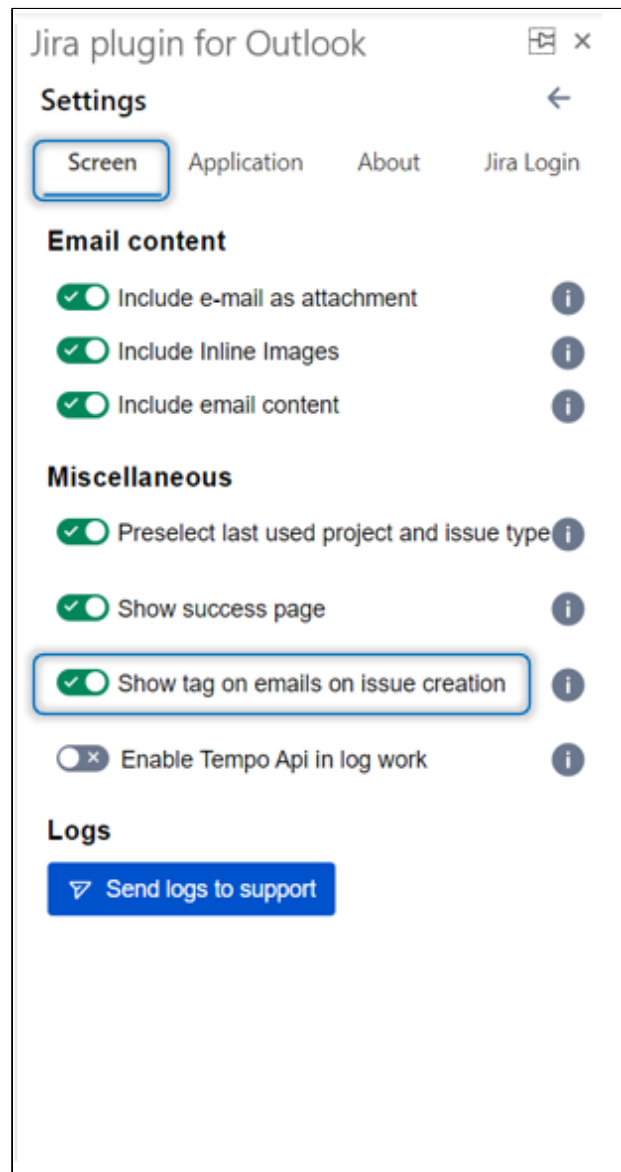

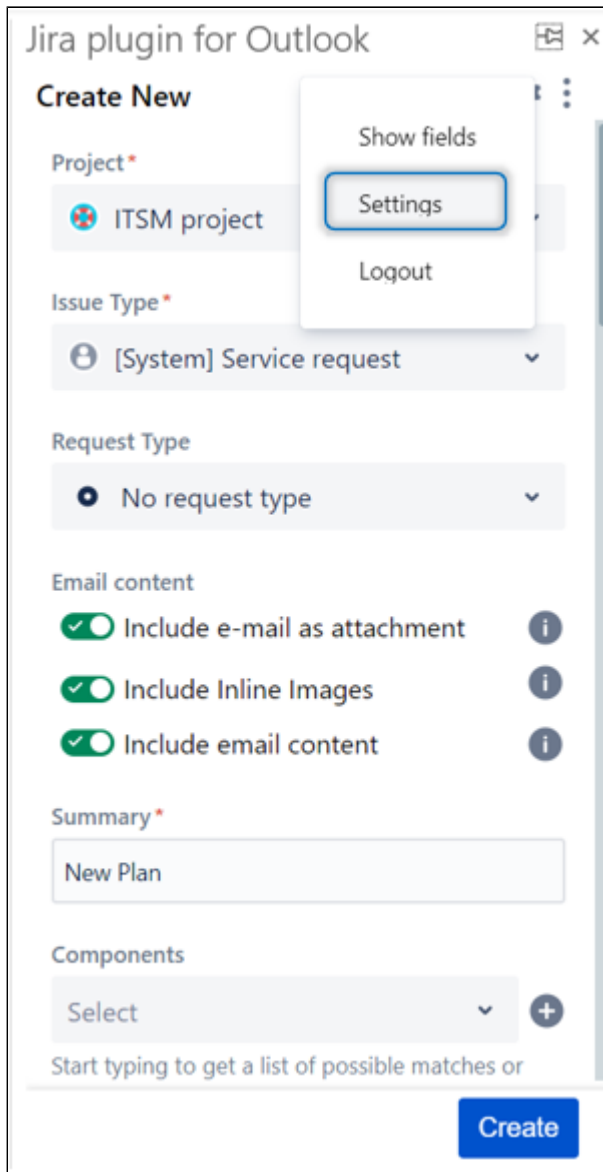

Quick Steps

 You can disable this feature whenever you would like from the settings screen.

Step #	Action
1	Go to Setting Screen
2	In the Screen Tab Check the ' Show tag on emails on issue creation ' toggle to enable this feature
3	Go to the Create Screen and Create an Issue
4	Now after creating an issue, you'll be able to see the notification and the category tag

Detailed Steps

- Go to **Setting Screen**
- In the **Screen Tab** Check the '**Show tag on emails on issue creation**' toggle

- Go to the Create Screen, and Create an Issue
- After this **you can check the notification and the category tag as below**
