

4.1.0

Display Insight fields

The new version allows you to display Insight fields when you create a new issue.

Custom Work Attribute fields in Tempo

○ Support “**work attributes**”
fields in Tempo

You can now create custom work attribute fields in Tempo and view them through the add-on.

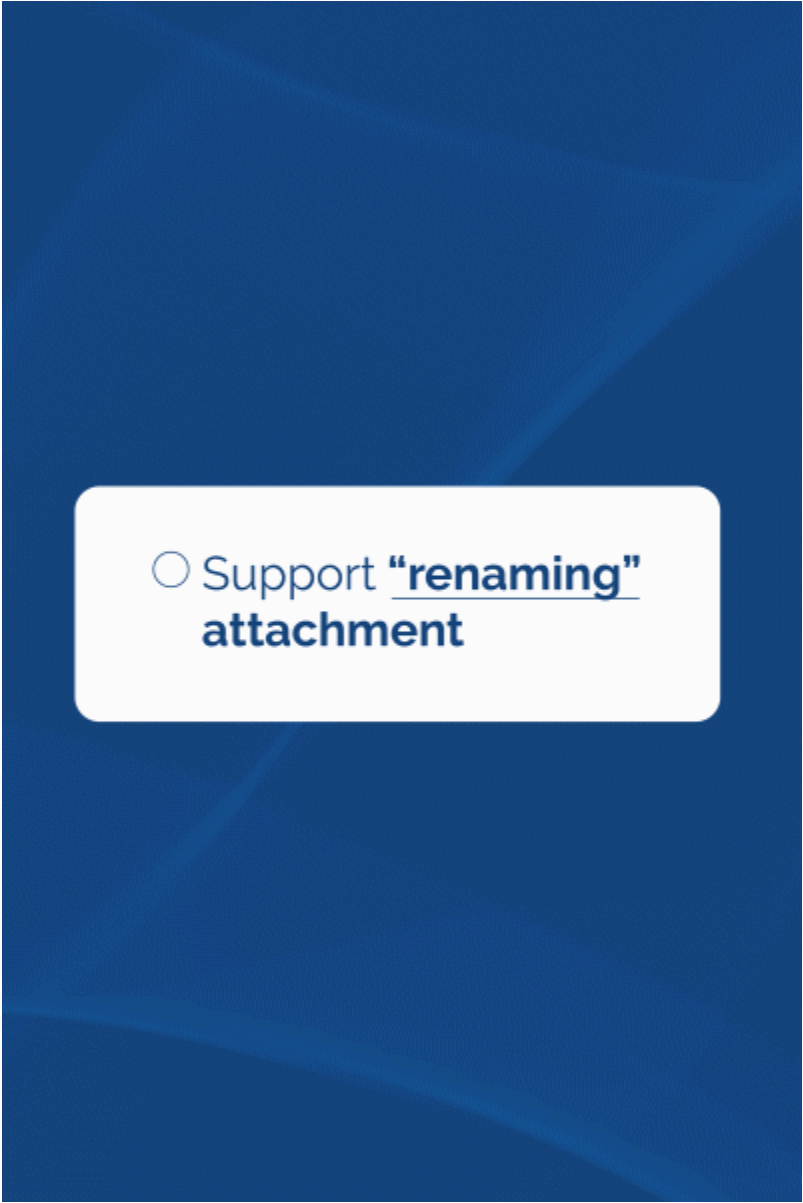

[Preview attachments](#)

○ Support ability to
“preview” attachments

The latest release now allows you to preview attachments found on Jira tickets.

Rename attachments

○ Support “renaming”
attachment

Additionally, you will be able to rename attachments without needing to upload them again with new names.
