

## 4.2.0

### View Issue Detail Screen

You can now view the Issue Detail screen when you open an issue from the search bar or from the related issues.

### Inline Editing

You can now write and edit content straight from the Issue Detail screen.

### View Recent Issues in Issue Search

☐ Support "Issue  
Suggestion" on Search

Searching for issues will be much easier now with the drop-down option that shows you the five most recent issues you'd been working on to quicken the process

Create New Customers

○ Support **“Creating  
New Customers”**

You can now create new customers from the 'On Behalf of' and 'Reporter' fields.

Add Tags Next to Customer Names

## ○ Support “Labeling Customers”

One new feature that can help with filtering and improving categorization is the ability to now add tags next to customer names. Such as whether they're new customers or if they are existing ones.

Add Comments Quickly

○ Support **“Quick  
Comment”** from issue  
card quick actions

There's an easier way to add comments to issues now, simply by doing it through the quick actions
