

Arabic for Confluence

Arabic for Confluence is a feature-rich language pack that brings a seamless Arabic translation experience to Atlassian's Confluence platform. With a complete translation of Confluence spaces, pages, notifications, and messages, users can effortlessly interact with the platform in Arabic. The add-on goes a step further by providing reliable Right-to-Left (RTL) support for Summary, Description, and comment fields, ensuring a polished and authentic user experience. Moreover, users can stay up-to-date with the latest Confluence releases, as the add-on offers regular updates to maintain compatibility. By simply adjusting their language preference in the profile settings, users can unlock the full potential of Confluence in Arabic, enhancing collaboration and communication within the workspace.

Key Features:

- Full Arabic Translation
- User-Friendly Language Switching
- RTL (Right-to-left) support when writing
- Regular Updates
