v28

We're excited to introduce several enhancements and fixes in this latest release, focused on delivering a smoother and more reliable user experience. Here are the key highlights:

- **Improvements to the Login Process:**

  We've dedicated significant efforts to enhancing the login process, streamlining user interactions, and optimizing performance. Your login experience is now more seamless and efficient, ensuring a hassle-free start to your sessions.

- **Bug Fixes:**

  In our commitment to delivering a polished application, we've addressed various bugs reported by our vigilant users. This release includes fixes for issues that could impact the stability and functionality of the platform. Your feedback has been invaluable in helping us create a more robust and reliable product.

- **Code Refactoring:**

  Behind the scenes, we've invested time in refining our codebase. This includes thorough code refactoring to improve maintainability, readability, and scalability. While these changes may not be immediately visible, they lay the foundation for a more stable and extensible platform in the future.

- **Announcement Section Dismiss Functionality:**

  We've resolved an issue with the dismiss functionality in the announcement section of **our Jira in Chrome Extension**.

As always, we appreciate your ongoing support and feedback. Feel free to reach out to us with any questions, concerns, or suggestions as we continue to strive for excellence in providing you with the best user experience.

Thank you for choosing GTJ Jira Connector!
