

How to add Microsoft Outlook for Jira to Outlook "Windows"

After installing the corresponding server side of this add-on from the [Atlassian Marketplace](#), three options are available in order to download the newest client version for Outlook to Jira.

Outlook COM add-ins are **not supported** in the new Outlook for Windows; however, [web add-ins](#) are supported.

Option 1: Full Package (All Dependencies)

- Recommended for initial installations
- Compatible with Outlook 2007, Outlook 2010, Outlook 2013, Outlook 2016, and Outlook 2019
- Size: 237 MB
- [Download the Full Package](#) - Version 5.1.6 (**Latest**)
- To begin the installation process, please refer to the installation section

Option 2: Workstation Package (Without Dependencies)

- Recommended for upgrading existing installations
- Compatible with Outlook 2007, Outlook 2010, Outlook 2013, Outlook 2016, and Outlook 2019
- Size: 30 MB
- Prerequisites required on the client's machine:
 - .Net Framework 4.5
 - VB Power Packs
 - For Outlook 2007 only: Office 2007 Primary Interop Assemblies
 - For Outlook 2010 and above: Office Run-time 2010
 - WebEdgeView runtime
 - NodeJs v.node-v16.14.2 (**This will be prompted for installation when you install OTJ-Beta.msi**)
- [Download Upgrade Package](#)- Version 5.1.6 (**Latest**)
- To initiate the installation process, please refer to the installation section

Option 3: Enterprise Package (32 & 64 Bit)

- Designed for automatic deployment using Microsoft Active Directory. For a detailed deployment guide, check this [link](#)
- Compatible with Outlook 2007, Outlook 2010, Outlook 2013 & Outlook 2016 & Outlook 2019
- Size: 476 MB
- [Download Enterprise Package](#) - Version 5.1.6 (**Latest**)
- For step-by-step installation instructions, please refer to the installation section
