- ## Create Screen Enhancement:
  - **Improved Fields Ordering**, prioritizing displaying main and frequently used system fields.
  - A **"More Fields" section** was implemented for displaying all other system and custom fields.
  - A **"Log Work" section** was added, allowing for efficient time tracking.
  - Added a '**Home' button** in the create screen footer for quicker navigation to the home page - main menu.

- ## Reserve Last Selected Project & Issue Type:
  - Improved user experience by preserving the last selected project and issue type, enabling users to create an issue with just two clicks.

- ## Expanded System and Custom Fields Support:

  Introduced new fields to enhance data capture capabilities, such as:

  - **Security Level System Field**
  - **Organization Field**
  - **Affects Versions Field**
  - **Labels search enhancement - you can now create new labels directly from GTJ - Create screen**

- ## Bug Fixes:
  In our commitment to delivering a polished application, various bugs were addressed. This release includes fixes for issues that could impact the stability and functionality of the platform.

Happy exploring! Experience the benefits of enhanced data management and improved performance with this latest release. If you're happy with these updates don't hesitate to add a review **here**.

Thank you for choosing GTJ Jira Connector!
